Emergency Management and Security (Recap) – by Judi Adams

At the June IAN/Scholarship meeting, we were honored to have Dr. Michael Wallace, Director, and Dr. Nina Cleveland, Associate Director, of the Tulane University School of Professional Advancement (SoPA) Emergency and Security Studies as the keynote speakers.

Dr. Wallace (Mike) is a professor of practice and program director, as well as US Navy (retired) and Civilian Intelligence Officer. Dr. Cleveland (Nina) is a professor of practice and assistant program director, in public health and emergency preparedness.

Nina opened up with the roots of modern emergency management, explaining that individuals and communities have strived to recover and react to disasters for a very long time. Cave hieroglyphics depict dwellers dealing with disasters. The Christian Bible speaks of many disasters that befell early civilizations. But, organized disaster recovery is a more modern approach.

Emergency management has evolved from reactions that relate to single events to wide changes in our approach to hazard risks, in communities, nations, and the planet. From the Congressional Act of 1803 providing support to a New Hampshire town, to Franklin Roosevelt's National Recovery Administration in 1933; U.S. Army Corps of Engineers in 1934; Defense Department's Office of Civil and Defense Mobilization in 1958; John F. Kennedy's Office of Emergency Preparedness in 1961; National Flood Insurance Program of 1968; Housing and Urban Development's Disaster Relief Act of 1974; to more recent acts to provide needed funding for recovery from disasters, our government has continually updated and added provisions to assist our communities in times of mass shootings, floods, hurricanes, tornadoes, chemical spills, etc.

The purposes of emergency management are to reduce or avoid potential losses from hazards, to assure prompt, appropriate assistance as needed, and to achieve rapid and effective recovery. Emergency managers understand the dynamics behind each hazard so the plans can reduce exposure, vulnerability, and risk, focusing on Preparedness, Response, Recovery, and Mitigation.

Hazard identification, vulnerability assessment, and impact analysis are important steps, used to understand risks and prepare for or mitigate against occurrences. Types of hazards include natural hazards (hurricanes, floods, tornados), technical hazards (fire, HAZMAT, nuclear, WMD), and public health hazards (outbreaks, bioterrorism). Organizations such as the CDC are vital partners in emergency management.

Emergency managers are essential in almost every sector – local, state, and federal public; private – industry – sector; and healthcare. Public/Private partnerships are crucial – no government can solve problems caused by a disaster. It takes a team to accomplish recovery.

Dr. Wallace (Mike) spoke on homeland security, explaining that it protects our borders, critical infrastructure, and the populace against terrorism or actions of rogue states. Intelligence and counter-terrorism forces are used to identify, find, and neutralize threats. The US Military forces are used in support of civil authorities and for Homeland Defense. Homeland Security Intelligence is used to collect and analyze information about threats to countries and people. The US Intelligence sector is comprised of numerous agencies, including CIA, NSA, Marine Corps, Air Force, and 13 other agencies functioning under the Intelligence Community. Homeland Security identifies and eliminates counter-terrorism threats both within the country and overseas. Protection of our critical infrastructure assures safety for our ports, nuclear reactors, power plants, water treatment plants, chemical and refining companies, and railroad yards. Homeland Security protects our borders – air, land, and sea – from unauthorized entry.

Cyber security is protecting the country's internet access and defending sites from criminal and terrorist acts. FEMA has grant programs that enhance cyber security, build resilient communities, and fight terrorism. We are constantly under cyber attack through hackers.

Homeland Defense responds to threats that can't be handled by civilian agencies, e.g., ballistic missiles or commercial jets used as missile. It also supports civil authorities during disasters with military capabilities.

Degrees and Certificates available through Tulane SoPA include BA and MPS Homeland Security; MPS Emergency or Security Management; and Graduate Certificates in Emergency or Security Management. A recent recipient of a safety certificate was a 70-something student. It's never too late to learn, I see!

Industry Appreciation Night and Scholarship Awards

July 2019

Dear Southeast Region Members

July is here and the weather is really warming up. Please keep your eye on weather situations and always be prepared. I am looking forward to fall and our ADDC Convention in Kansas City, Mo.

The Registration forms for the ADDC Convention you have received. The meeting will be September 25th - 28th at the Kansas City Marriott Country Club Plaza. There are many fieldtrips, seminars and many other things to see and do. The site to use for tickets to Kauffman Stadium to see the Royals and the Atlanta Braves play at 7:15 PM on September 24th is listed. Site is www.mlb/ballpark/netting to order tickets. Deadline to order is 5:15 PM on the 24th.

I hope you are inviting guests to your monthly meetings. We now have 1,096 registered this year. This is an increase in our projections for this year. This growth helps us maintain a positive future for our members and offer education to our newer members. "Greater Knowledge - Greater Service".

If you have any concerns or issues; You can reach me by phone or email. Always remember, I am Your voice and I represent you, the members of the Southeast Region.

Evelyn McCurley-Ingram

July 2019

As we approach the second half of 2019 and the summer months of vacations, we must not let our passion for ADDC wane. Let's all continue the drive to increase our membership and spread the word about Desk and Derrick.

We are proud to announce we have 1096 members; this is exciting as we budgeted for 1080 members. We are over our projected number of renewals for our budget this year.

The 2019 Nominating Committee has worked very hard this year and I am happy to present the nominees for the slate of officers for 2020:

President-Elect	Evelyn Green
Secretary	Casi Nichols
Treasurer	Philana Thompson
	Maggi Franks

The forms and photos of the nominees were reviewed by the members of the 2019 Nominating Committee and were approved as received.

We are drawing near to our 68th Annual Educational Conference and Convention. I hope you have all sent in your registrations and are looking forward to a great experience in Kansas City. The Central Region is working very hard to make this a memorable time for everyone.

We have THREE free seminars --- "Programs! Programs! Get Your Programs Here!", "Helpful Hints for Small Clubs" and "Social Media Marketing: Facebook and Twitter". I think you will find these seminars informative and entertaining. And, it never hurts to learn more about this association and what it takes to make it run. It will be a great learning experience.

Be sure you get your official Credentials Report sent in for your delegate and alternate so that your delegate will be eligible to vote at the convention. This

form must be sent in to your regional Credentials representative and on record so that your delegate can vote for you, the member.

I wish each of you a great summer! Happy Canada Day on July 1st to our Canadian members and Happy Independence Day on July 4th to our American members.

Remember --- “In the waves of change we find our direction.” --- Anonymous

LAGCOE 2019

connect•explore•discover

THE FUTURE OF ENERGY STARTS HERE

OCTOBER 9-11, 2019
NEW ORLEANS, LA

Join us at LAGCOE 2019 Oct. 9-11, 2019, in New Orleans, Louisiana, USA at the New Orleans Ernest N. Morial Convention Center for access to state-of-the-art equipment, service, and technologies as well as technical presentations from worldwide leaders in the onshore and offshore oil/gas exploration and production industry.

CONFERENCE HOURS:

Wednesday, Oct. 9, 2019 8 a.m. - 6 p.m.

Thursday, Oct. 10, 2019 8 a.m. - 6 p.m.

Friday, Oct. 11, 2019 8 a.m. - 3 p.m.

EXHIBITION HOURS:

Wednesday, Oct. 9, 2019 10 a.m. - 6 p.m.

Thursday, Oct. 10, 2019 10 a.m. - 6 p.m.

Friday, Oct. 11, 2019 10 a.m. - 2 p.m.

THE HISTORY OF LAGCOE'S TECHNICAL EXPOSITIONS & CONFERENCES

One of the world's pioneer oil and gas industry expositions, LAGCOE, now in its 64th year, was established in 1955 and is home to thousands of energy industry companies with a global impact.

LAGCOE began with an unofficial "exposition" which took place in the parking lot of the Petroleum Club of Lafayette in 1953. The first true LAGCOE exposition happened two years after the parking lot show, at Lafayette, La.'s Blackham Coliseum with an exhibitors list that included about 130 exhibitors from 10 states, including Texas, California, New York, and of course, Louisiana.

The exposition continued to grow, eventually outgrowing the space at the Blackham Coliseum. In 1995, LAGCOE moved to The Cajundome & Convention Center where it evolved into the first-class technical exposition & conference it has become today. Although the face and interests of LAGCOE have changed as the industry has, many traditions still hold true. To learn more about LAGCOE's rich history, visit our [LAGCOE History page](#).

LAGCOE continues to strengthen its long-standing history of commitment to promote the growth of the energy industry. LAGCOE exhibits and technical presentations are carefully crafted each exposition to support bold, innovative approaches in the global quest for energy.

BE PREPARED FOR A HURRICANE

FEMA

FEMA V-400017 May 2008

Threats from hurricanes include powerful winds, heavy rainfall, storm surges, coastal and inland flooding, rip currents, tornadoes, and landslides.

Hurricanes are massive storm systems that form over warm ocean waters and move toward land. The Atlantic hurricane season runs June 1 to November 30. The Pacific hurricane season runs May 15 to November 30.

Can happen along any U.S. coast or territory in the Atlantic or Pacific

Can affect areas more than 100 miles inland

Most active in September

IF YOU ARE UNDER A HURRICANE WARNING, FIND SAFE SHELTER RIGHT AWAY

Determine your best protection for high winds and flooding.

Evacuate if told to do so.

Take shelter in a designated storm shelter or an interior room for high winds.

Listen for emergency information and alerts.

Only use generators outdoors and away from windows.

Do not walk, swim, or drive through flood waters.

HOW TO STAY SAFE WHEN A HURRICANE THREATENS

Know your area's risk of hurricanes.

Sign up for your community's warning system. The Emergency Alert System (EAS) and National Oceanic and Atmospheric Administration (NOAA) Weather Radio also provide emergency alerts.

If you are at risk for flash flooding, watch for signs such as heavy rain.

Practice going to a safe shelter for high winds, such as a FEMA safe room or ICC 500 storm shelter. The next best protection is a small, interior, windowless room in a sturdy building on the lowest level that is not subject to flooding.

Based on your location and community plans, make your own plans for evacuation or sheltering in place.

Become familiar with your evacuation zone, the evacuation route, and shelter locations.

Gather needed supplies for at least three days. Keep in mind each person's specific needs, including medication. Don't forget the needs of pets.

Keep important documents in a safe place or create password-protected digital copies.

Protect your property. Declutter drains and gutters. Install check valves in plumbing to prevent backups. Consider hurricane shutters. Review insurance policies.

If told to evacuate, do so immediately. Do not drive around barricades.

If sheltering during high winds, go to a FEMA safe room, ICC 500 storm shelter, or a small, interior, windowless room or hallway on the lowest floor.

If trapped in a building by flooding, go to the highest level of the building. Do not climb into a closed attic. You may become trapped by rising flood water.

Listen for current emergency information and instructions.

Use a generator or other gasoline-powered machinery ONLY outdoors and away from windows.

Do not walk, wade, or drive through flood waters. Turn Around. Don't Drown®. Just six inches of fast-moving water can knock you down, and one foot of moving water can sweep your vehicle away.

Stay off bridges over fast-moving water.

Listen to authorities for information and special instructions.

Be careful during clean-up. Wear protective clothing and work with someone else.

Do not touch electrical equipment if it is wet or if you are standing in water. If it is safe to do so, turn off electricity at the main breaker or fuse box to prevent electric shock.

Avoid wading in flood water, which can contain dangerous debris. Underground or downed power lines can also electrically charge the water.

Save phone calls for emergencies. Phone systems are often down or busy after a disaster. Use text messages or social media to communicate with family and friends.

Document any property damage with photographs. Contact your insurance company for assistance.

Take an Active Role In Your Safety

Go to ready.gov and search for hurricane. Download the **FEMA app** to get more information about preparing for a hurricane.
